https://web-development-environments-2021.github.io/209295732_311508568/

Students:

- Roze Kopylov – 209295732
- Lielle Todder – 311508568

Added functionality:

- Extra life – A heart that is placed randomly on the board. When the pacman eats it, the player gets one extra life that is also added to the counter on the left.
- Stronger monster – The blue monster, that starts on the top left corner of the board, is stronger than the others: If it catches pacman, the player loses two lives instead of one, and the score is reduced by 20 instead of 10.
